Profile

Motivated Flutter Developer with over 3 years of experience of mobile application development, building cross-platform mobile application with scalable architecture using Flutter, Firebase, and BLoC. Skilled in delivering complex features like offline sync, AI-powered tools, and QR-based interactions. Proficient in Clean Architecture, SOLID principles, and responsive UI/UX implementation. Passionate about clean code, innovation, and performance optimization. Capable of leading projects end-to-end or collaborating in agile teams.

Skills

Languages	Frameworks & Mobile	Architecture	State Management:
• Dart • Java • Kotlin • Swift • C++ • Python	• Flutter Android & iOS • Cross-Platform • NodeJs Backend	• OOP • MVC • MVP • MVVM • Clean Architecture • SOLID	• BLoC • Cubit • provider • riverpod
Backend & APIs	Storage	UI/UX	Tools
• Firebase • Supabase • RESTful APIs	• Hive • Shared Preferences • Local DB	• Responsive Layouts • Design Patterns • flutter_screenutil • Theme System	• Git • Agile • Version Control • Application Deployment

Projects

Taagira App

(Freelance - Rental car app)

- A mobile car rental app built from scratch that allows users to rent or list vehicles with location-based search and secure authentication. Developed with a clean architecture and real-time features for seamless car booking..
- Flutter, Firebase, Firestore, Hive, BLoC, Geolocation, booking, and user management implemented.
- Developed and tested app for both iOS and Android platforms.
- Ensured strong architecture using OOP, SOLID, and MVVM principles.

V-School App

(Investment app)

- A school management platform enabling teachers to manage lessons, attendance, and assignments, while parents can track their children's performance. Built as a customizable SaaS product with real-time sync.
- Modular MVVM structure with role-specific dashboards.
- Worked on a complete education management app supporting real-time updates, notifications, and scheduling.
- Integrated RESTful services, user roles, and classroom features using Backend APIs. design.

Halla App

- A smart networking app for digital contact sharing using QR, NFC, and AI-generated job tags. Supports offline syncing, multi-authentication, and contact management with local and cloud storage.
- Complex architecture combining Firebase, local storage, and AI tools.
- Firebase, Firestore, Hive, AI, NFC, BLoC, Clean Architecture, QR Code, Local Storage

Wasla App

(Graduation project)

- A smart delivery collaboration app that connects users who want to buy products from other cities with travelers heading in that direction—reducing delivery costs. It features secure in-app chat, contract approval, and pre-payment via Paymob. AI with NLP is used to monitor conversations and detect prohibited content.
- Firebase, Firestore, Hive, Paymob API, NLP, Clean Architecture, BLoC

POS App

2025 – present

- A retail point-of-sale application supporting inventory tracking, billing, and customer management. Includes offline data handling and cloud synchronization for small business operations.
- Flutter, Hive, Firebase, Clean Architecture, BLoC, Local Database, Offline Sync

YallaBay App

present

(Freelance project)

A mobile marketplace app where users can post, browse, and contact sellers for listed products and services—similar to Dubizzle.
Flutter, RESTful APIs, BLoC, Listing System, Messaging

Professional Experience

Simple Galaxy Software Development Company

2024 – present
Beni Suef, Egypt

Flutter Developer

- Built and deployed cross-platform mobile applications for Android and iOS using Flutter, Firebase, and RESTful APIs.
- Collaborated with cross-functional teams to deliver testable, scalable apps.
- Applied Clean Architecture, MVC/MVVM, and BLoC for better maintainability.

- Managed full lifecycle: design, development, testing, and deployment to Play Store.

Freelance Flutter Developer

present

Independently developed feature-rich mobile apps for diverse domains like car rentals, education, POS, and social platforms.

Focused on user-centric design, app optimization, and advanced integration (e.g., AI, NFC, offline sync).

Education

Beni Suef University Of Computer And Artificial Intelligence

2020 – 2023

Bachelor's Degree in Computer Science

Beni Suef, Egypt

Additional Info

ACPC

(Problem Solving)

Participated in ACPC (Arab Collegiate Programming Contest)

Soft Skills

- problem-solving skills
- critical thinking abilities
- Effective communication and team collaboration
- Adaptable and quick to learn new tools and technologies
- Detail-oriented with a focus on clean and maintainable code
- Time management and ability to handle multiple tasks efficiently
- Passionate about continuous learning and professional growth
